

Easy, fast and cost-effective!

New marking of Siemens S7 and ET 200 modules

EMT strips on rolls for Thermomark printers from Phoenix Contact

The EMT insert strips are exactly tailored to the dimensions of the Siemens ET 200S and S7 300 modules. The micro-perforation of the material off the roll allows a fast and clean separation of individual labels. The high-temperature and solvent-resistant polyester foil ensures a firm fit in the module accommodation. Thus, material losses as with DIN A4 insert sheets with laser printing are minimized.

Marking options

In combination with the marking software CLIP PROJECT marking and/or CMS-MARK-WIN, all relevant marking data for the marking of modules can be created efficiently and economically.

Via the integrated data interface to CAD/CAE systems, data from the PLC assignment list can be quickly and easily read out and output via individual material descriptions.

Article overview

ARTICLE	ART. NO.	TYPE	Color	Piece/roll
EMT (50/28X13)R	0800049	ET 200S	White	500
EMT (50/28X13)R TQ	0800050	ET 200S	Turquoise	500
EMT (50X26)R YE	0800054	ET 200S	Yellow	500
EMT (50X26)R TQ	0800053	ET 200S	Turquoise	500
EMT (50X26)R	0800052	ET 200S	White	500
EMT (103X23)R	0800040	S7-300	White	500
EMT (103X23)R TQ	0800042	S7-300	Turquoise	500
EMT (103X17)R	0800039	S7-300	White	500
EMT (103X17)R TQ	0800041	S7-300	Turquoise	500

The basic materials are adjusted in the editing mode to, for example, place separating lines on individual IO cards for better subdivision.

The output of data is possible with all X1.x. and S1.x Thermomark printers.
